

How do I import products by URL?

01) Access the Control Panel

02) After login click on Catalog >> Import Products by URLs

03) In the Suppliers field you can find only the suppliers that are supported to import products by url.

Note: If your vendor provides API integration is more recommended, contact us and send us the integration manual for review.

If your supplier is not on this list you can contact us to analyze a possible integration of products by your supplier's url.

04) Fill in the fields:

Category: To which category the products should be imported

Change price: Enter your profit margin by percentage or value

Product Currency: If the product link is different from your main currency, the system will automatically convert using the values defined in the Control Panel >> Locations >> Coins

URL of imported product: Paste product URLs one below the other as directed in the field to avoid import errors.
