

# Customers

## How to obtain the list of States of the countries via API?

URL: [http://www.nomedoseusite.com.br/api\\_customers.php?country\\_id=COUNTRY\\_ID&action=customers\\_state](http://www.nomedoseusite.com.br/api_customers.php?country_id=COUNTRY_ID&action=customers_state)

Parameter	Format	Description
country_id	GET	Number of the Country ID Check the API to get the list of country Only number is required Format: int(11) * FIELD REQUIRED

### PHP Sample:

```
// sample customers state list

$add_query_order = '';
$country_id = '';
if ($country_id != '') {
    $add_query_order .= '&country_id='.$country_id;
}

$url = $domain_url . '/api_customers.php?action=customers_state'.$add_query_order;

$ch = curl_init($url);
curl_setopt($ch, CURLOPT_RETURNTRANSFER, true);
curl_setopt($ch, CURLOPT_SSL_VERIFYPEER, false);

curl_setopt($ch, CURLOPT_HTTPHEADER, array(
    'Content-Type: application/json',
    'Cache-Control: no-cache',
    'Usuariol: ' . base64_encode($usuariol),
    'Senha1: ' . base64_encode($senha1))
);

$result = curl_exec($ch);
curl_close($ch);

print_r($result);

// sample customers state list eof
```

# Customers

Return:

id  
text

Unique solution ID: #2080
