**I do not want to migrate my domain right now i would like to use the temporary url and without friendly urls?**

01) Access the Control Panel

02) After login click Settings >> SEO URLs

03) On the line Enable SEO URLs? >> Options >> Edit

04) Change to false = disable

Note: Once you have the domain in use, it is important to use Friendly URLs to perform better on search sites

05) Ask MFORMULA by email or help desk to change from the url of the domain to the temporary url.
