

## **E-mail**

### **My e-mail program of the error saying that the password is invalid**

Probably the account is not configured correctly, remembering that the account name must contain the complete email Example: seuemail@nomedominio.com

If it is correct, we ask that you perform a test via WebMail. If you acknowledge the wrong password, ask to change the password through the control panel in the Help Desk option or change it through the Control Panel - cPanel.
