

E-mail

Setting up email on Iphone and Ipad

01) On the initial screen of your device, go to "Settings".

02) In the list of options, go to "Mail, Contacts, Calendars".

03) Select "Add Account":

04) Choose the option "Other":

05) Where is written email, go to "Add. Mail Account ".

06) Enter the data:

Name: Display Name

E-mail: email@domain.com

Password: Email account password

Description: Account description for device view

07) To continue, click "Next" in the upper right corner.

08) In "Incoming Mail Server" enter the data:

Hostname: mail.domain.com

Username: email@dominio.com.br

Password: Email account password

09) Below, under "Outgoing Mail Server", enter the data:

Hostname: mail.domain.com

Username: email@dominio.com.br

Password: Email account password

When the message below appears, click "Continue"

Leave the "E-mail" option checked, and click "Save".

Note: Disable the SSL option if you do not have a private SSL certificate for your domain. The port should be for Outbox: 587 (without SSL) and 465 (with SSL). The port should be for Inbox: 143 (without SSL) and 993 (with SSL).
