

Settings

How to enable / disable the category gallery with effects and hover images on the main page?

01) Access the Control Panel

02) After login click Configuration >> Categories and Subcategories Settings >> Show / Hide Box Categories Index >> Click on the EDIT button

True = Enable

False = Disable

03) After clicking the UPDATE button

04) To appear on the main page you need to insert images in the main categories.

Click Catalog >> select the main category and click the EDIT button.

In the 4th image field insert upload an image.

The ideal size is maximum width of 300pixel and minimum of 150pixel.

Using different sizes will effect a differentiated effect on the home page.
